Konnnect MCP Server

A Model Context Protocol (MCP) server for interacting with Kong Connect APIs, allowing AI assistants to query and analyze Kong Gateway configurations, traffic, and analytics.

Konnnect MCP
Server API

1.0.0

Overview

Overview

ENDPOINTS

Establish SSE connection

GET

Send message to MCP
server

POST

Get available tools

GET

Establish SSE connection

Creates a Server-Sent Events connection for real-time communication with the MCP server

GET https://ai-gateway.kong-sales-engineering.com/mcp-konnnect/sse

Response 200 text/event-stream

SSE connection established successfully

string

Stream of server-sent events

GET /sse

Try It!

Shell

```
1 curl --request GET \  
2 --url https://ai-gateway.kong-sales-engineering.com/mcp-konnnect/sse \  
3 --header 'Accept: text/event-stream' \  
4 --header 'Authorization: Bearer ' \  
5 --header 'Content-Type: text/event-stream'
```

200 text/event-stream

1 {}

Send message to MCP server

Sends a message to the MCP server through an established SSE connection

POST https://ai-gateway.kong-sales-engineering.com/mcp-konnnect/messages

Thanks!
