

Powering the API world

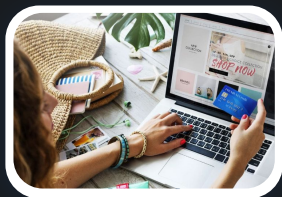

Challenges and Solutions for Enterprise Traffic Governance

Jintao Zhang @ Kong Inc.

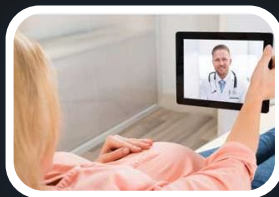

Apr 2025

APIs power the applications that your customers and employees rely on

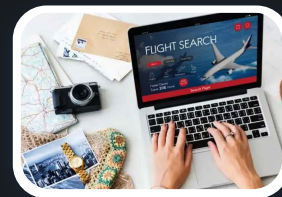

Retail

Health

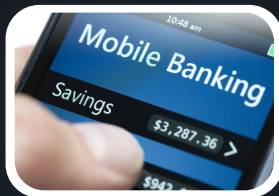

Work

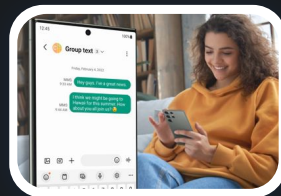

Travel

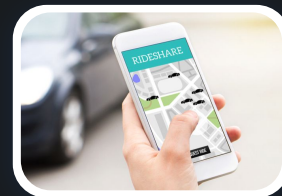

Entertainment

Banking

Communications

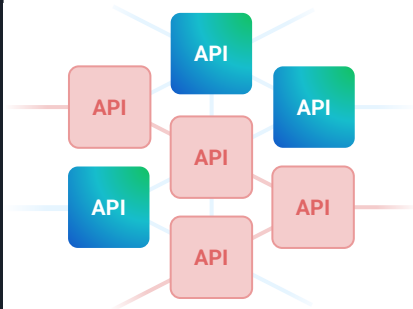

Transportation

APIs speed up innovation but need proper management

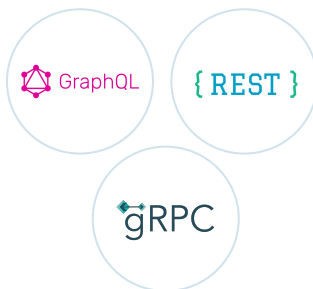

Not every API is visible or managed

Over **50%** of enterprise APIs will go unmanaged by 2025

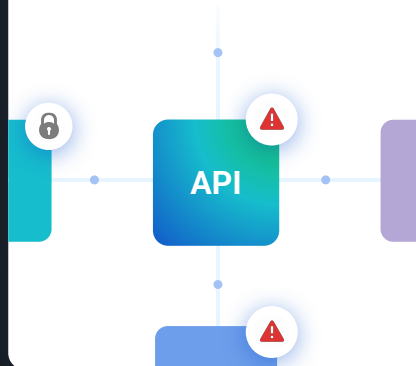

Every API is built and deployed differently

Organizations need diverse **implementations** (REST, GraphQL, gRPC), **use cases**, across different **hybrid / multi cloud** environments

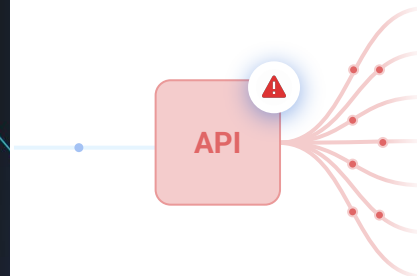

Every API is a new attack vector

50% of organizations experienced an API security incident in the last 12 months

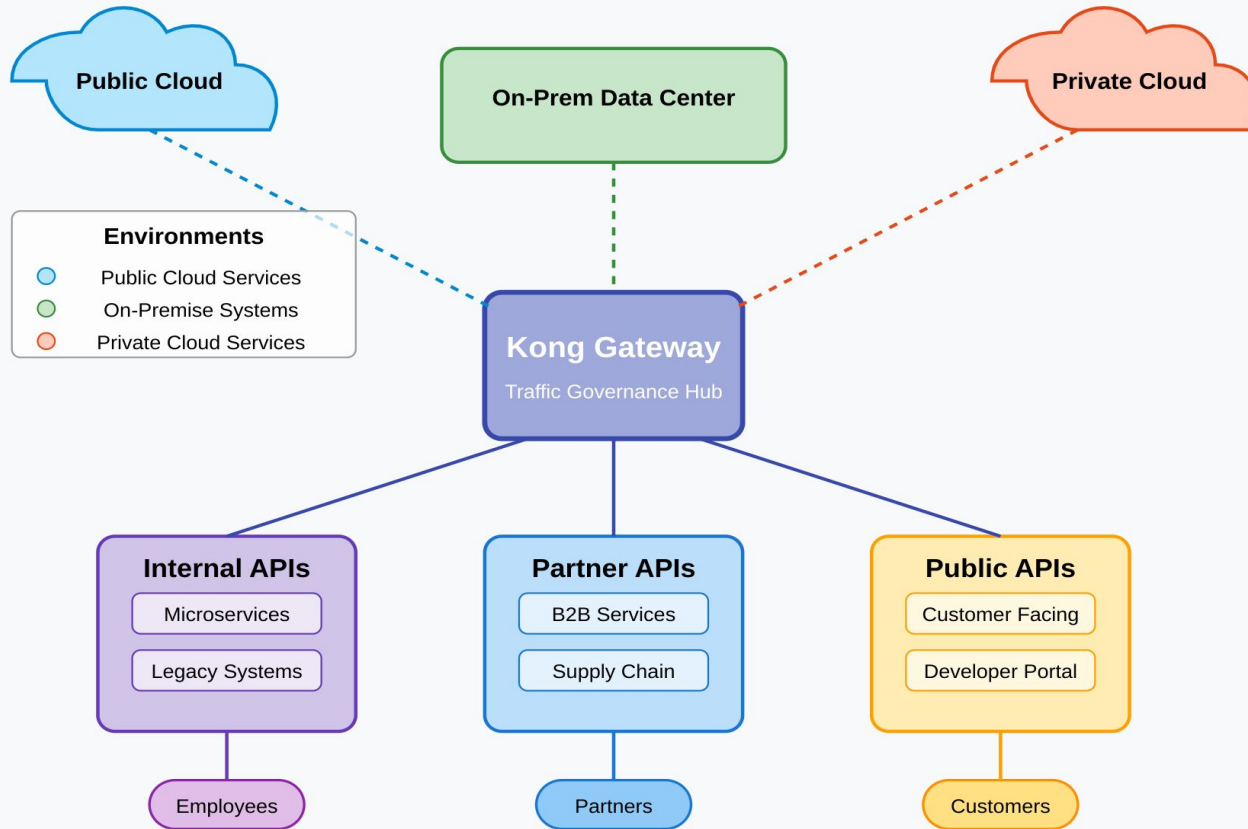

Every API transaction is critical

81% organizations said that one hour of downtime costs them > **\$300k**

Enterprise API Landscape

Traffic Governance Importance

Definition

Managing, securing, and monitoring API traffic across the enterprise

Managing

Rate limiting
Load balancing

Securing

Authentication
Authorization

Monitoring

Logging
Analytics

Business Risks of Poor Governance

Security Breaches

Performance Issues

Compliance Violations

Strategic Value of Effective API Governance

Business Agility

Faster time-to-market

Enhanced Security

Reduced attack surface

Cost Efficiency

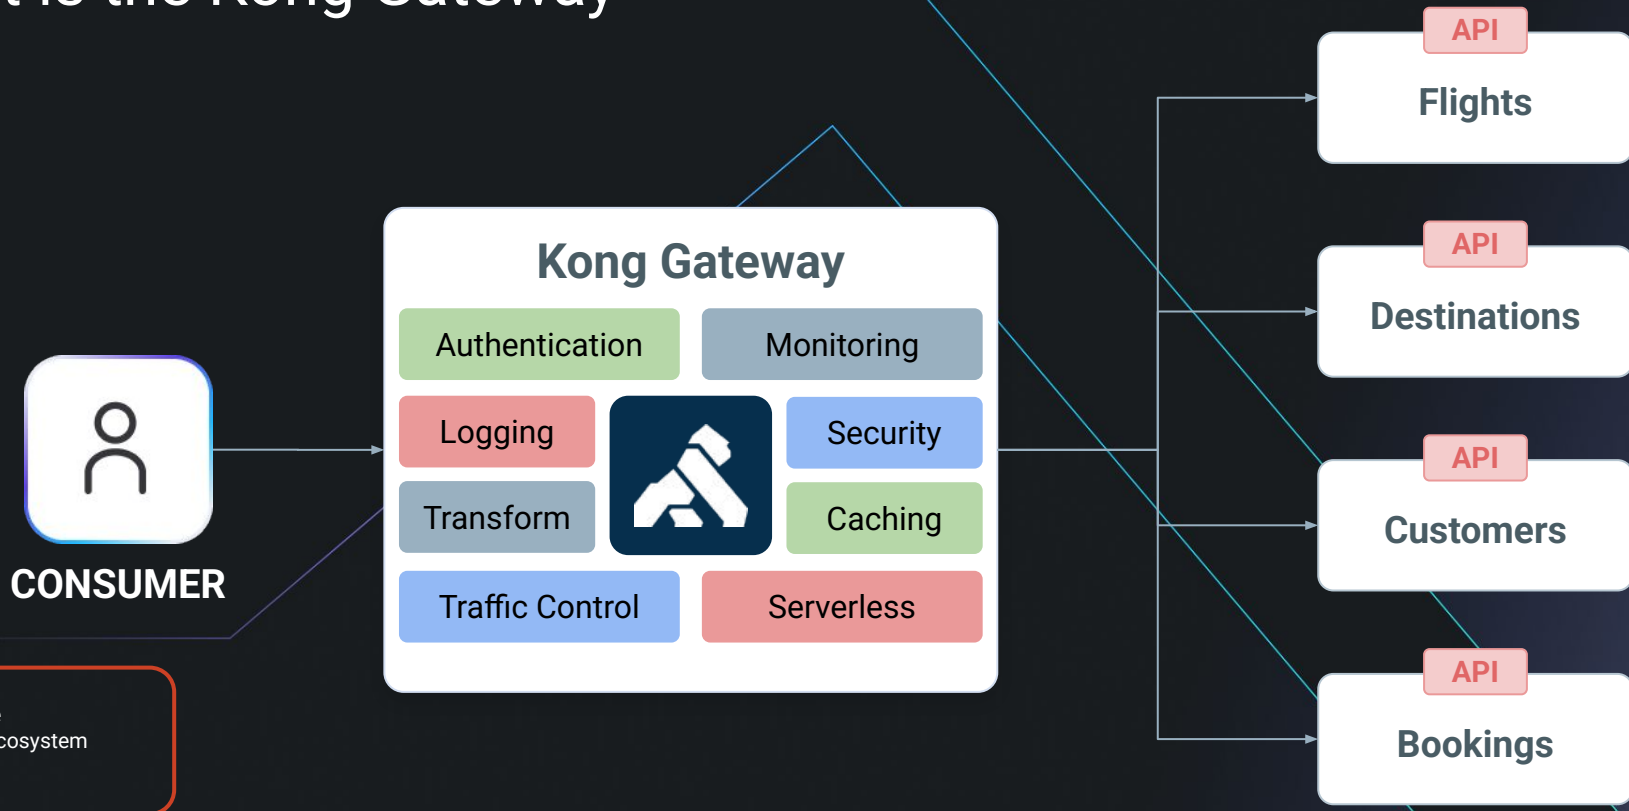

Optimized resources

Innovation

New business models

Kong Gateway provides comprehensive traffic governance capabilities

What is the Kong Gateway

The Kong API Platform

GOVERN & SECURE APIS

KONG KONNECT

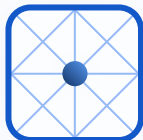

Manage APIs securely across any cloud, team, gateway, protocol, or architecture from one place

KONG ENTERPRISE

Extends the world's most trusted API gateway with advanced features and 24/7 support.

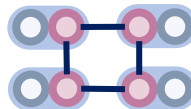

KONG GATEWAY

The world's most adopted API gateway. Lightweight, fast, and flexible

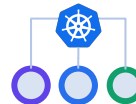

RUN APIS

KONG MESH

Easy to use and operate service mesh. Built on Kuma CNCF project

KONG INGRESS CONTROLLER

Natively manage APIs in Kubernetes with one unified control plane.

BUILD & TEST APIS

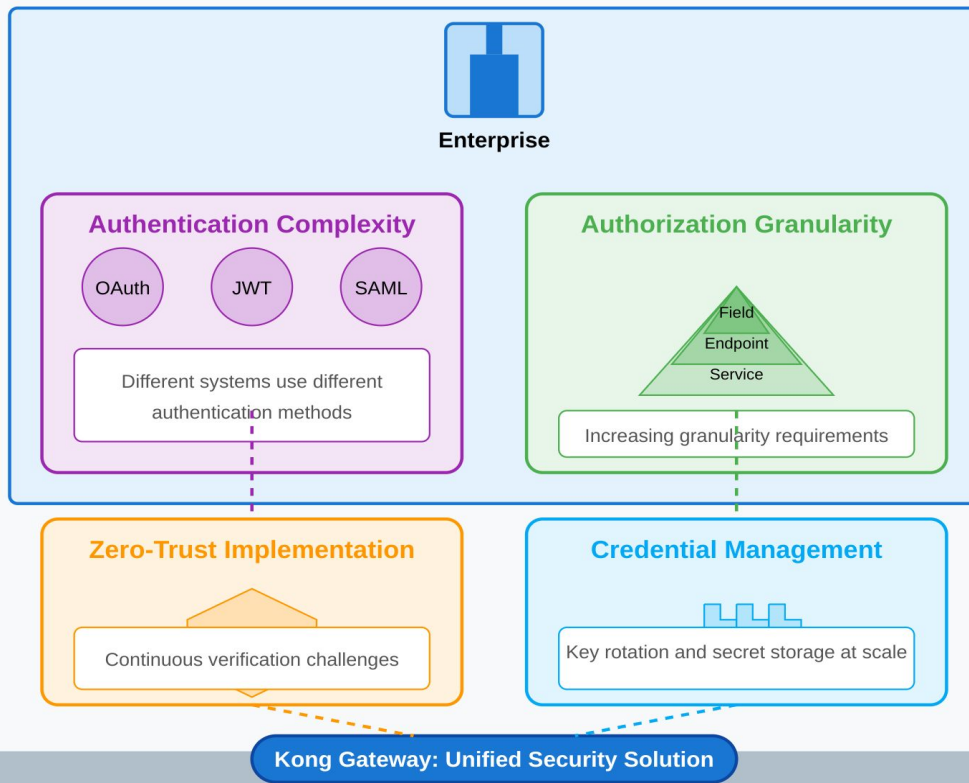

INSOMNIA

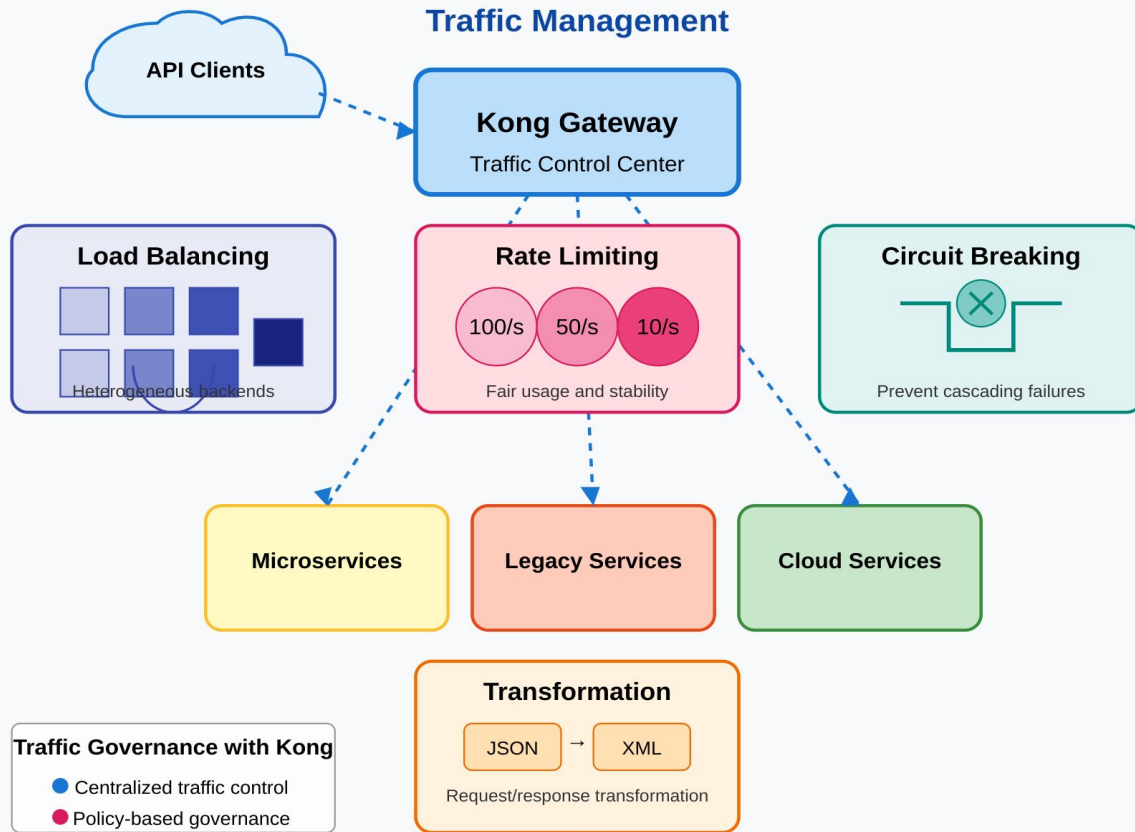

Design, debug, and test APIs locally or in the cloud

Common Enterprise Traffic Governance Challenges

Security and Access Control

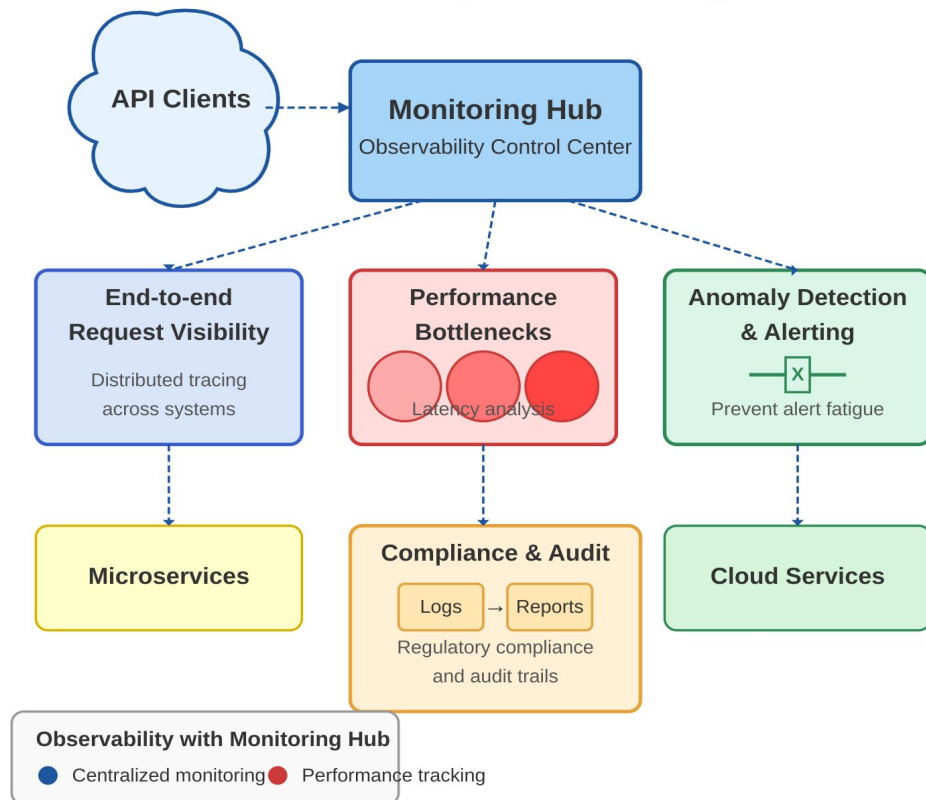

Common Enterprise Traffic Governance Challenges

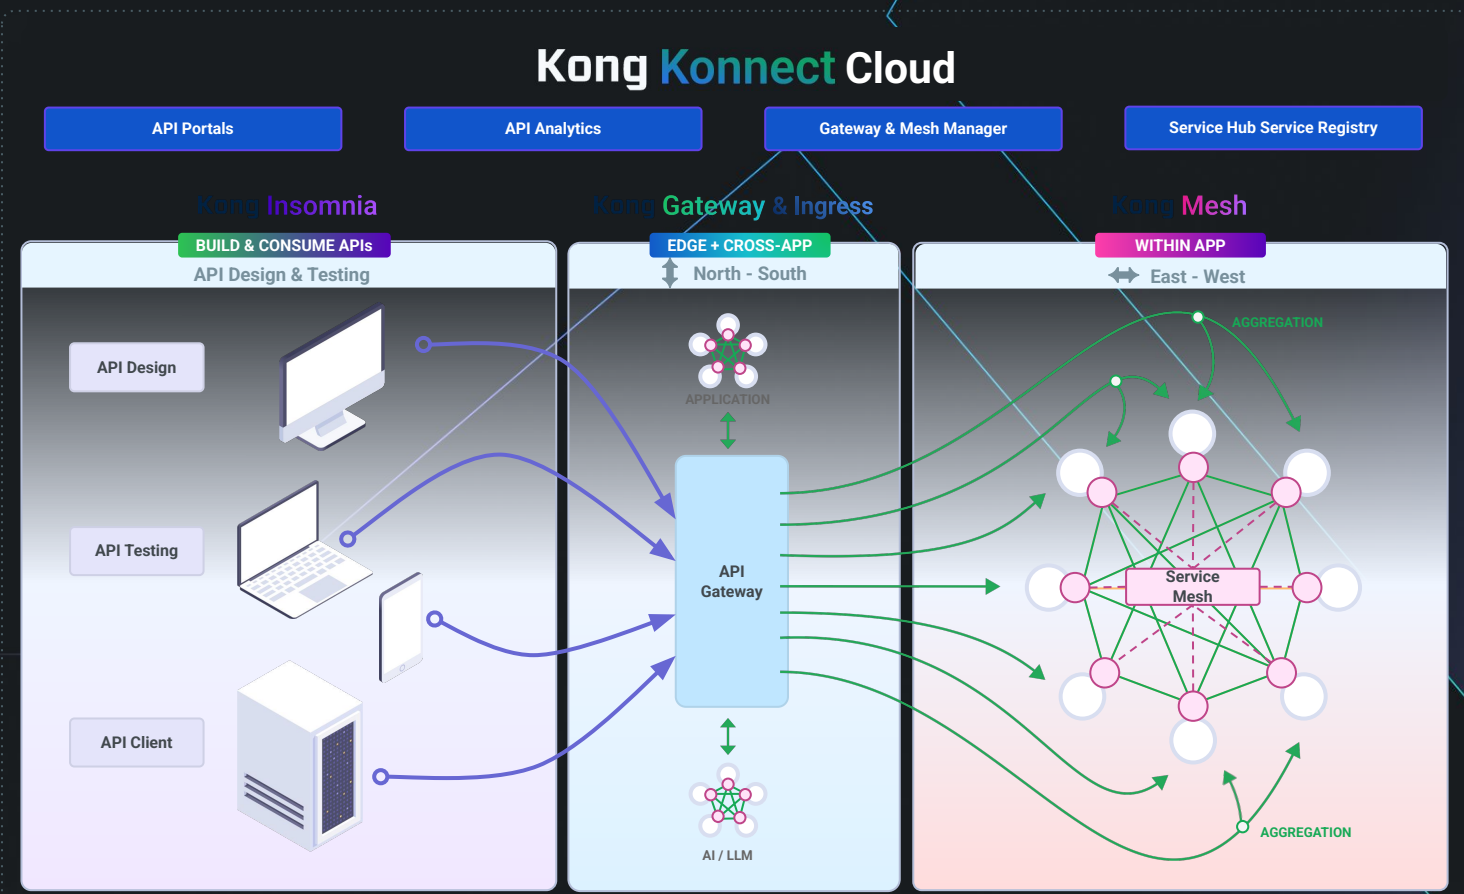

Common Enterprise Traffic Governance Challenges

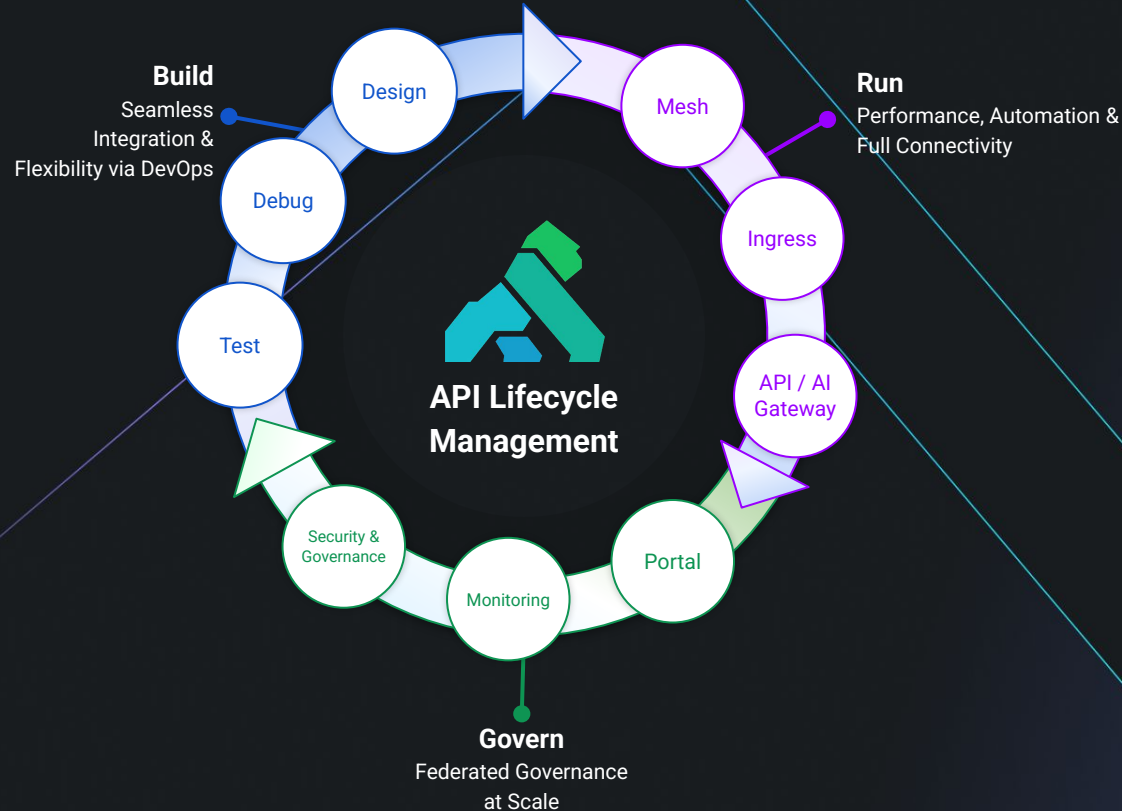

Observability and Monitoring

From API design to API governance and everything in between

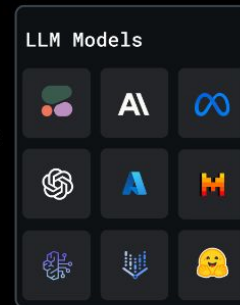

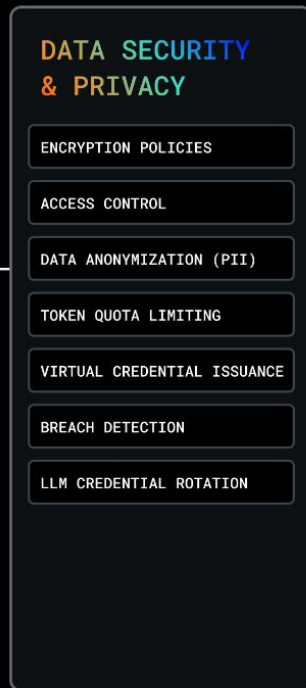

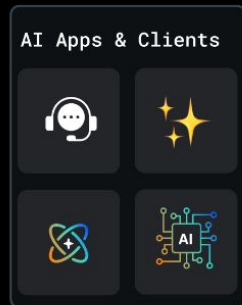

Kong enables your teams to drive Modern API Lifecycle Management

Kong **Kon**nect

Powering the API world

Thank you!
